Is it Possible to Legislate Life and Brains?

Swift & Company is primarily an organization of men, not a collection of brick, mortar, and machinery.

Packing Plants, their equipment and usefulness are only outward symbols of the intelligence, life long experience, and right purpose of the men who compose the organization and of those who direct it.

Will not Government direction of the packing industry, now contemplated by Congress, take over the empty husk of physical property and equipment and sacrifice the initiative, experience and devotion of these men, which is the life itself of the industry?

What legislation, what political adroitness could replace such life and brains, once driven out?
